An index divider system and method of organizing tab dividers comprising a set of dividers having staggered tabs and a sheet protector pocket having a front and back sheet. The pocket having an opening to receive a single sheet, wherein the single sheet is considered to be disclosed in combination with the pocket since sheet indicia on the single sheet is generally in alignment with printed indicia on the front sheet of the pocket. The sheet indicia on the single sheet is aligned with a respective one of the tabs when the single sheet is assembled with the set of index dividers in the viewing position.

Claims 31-35

An index divider system comprising a package having a set of dividers having staggered tabs and a sheet protector pocket having a front and back sheet. The pocket having an opening to receive a single sheet, wherein the single sheet is considered to be disclosed in combination with the pocket since sheet indicia on the single sheet is generally in alignment with printed indicia on the front sheet of the pocket. The sheet indicia on the single sheet is aligned with a respective one of the tabs when the single sheet is assembled with the set of index dividers. The indicia is aligned so that a first indicium on the single sheet aligns with the first tab of the first divider and a second indicium on the single sheet aligns with the second tab of the second divider. In a viewing position, the front sheet of the sheet protector pocket allows the sheet indicia on the single sheet to be viewed.

Claims 42, 47-51 and 57-61
